EDUCATION

Emory University, Atlanta, GA Spring 2027 (Expected)
Ph.D. in Economics
M.S. in Economics

Ball State University, Muncie, IN Spring 2022
B.S. in Economics and Finance, *Summa Cum Laude*
Minor in Mathematics

RESEARCH AND TEACHING INTERESTS

Health Economics, Mental Health, Risky Behavior and Substance Use, Applied Microeconomics

RESEARCH

Job Market Paper

“Crossing State Lines: Licensure Compacts, Provider Mobility, and Mental Health”

Works in Progress

“Interstate Licensure Compacts and Care Delivery”

TEACHING

Instructor of Record

- ECON 320 Lab: Econometrics (Spring 2026)

Teaching Assistant

- ECON 372: Economics of Health Care Markets (Fall 2023)
- ECON 415: Behavioral Economics (Fall 2024)
- ECON 371: Health Economics (Spring 2025)
- ECON 220: Data Science for Economists (Fall 2025)

WORK EXPERIENCE

Ball State University Muncie, IN
Center for Business and Economic Research 2020–2022
Student Researcher

- Retrieved, compiled, and prepared economic data from multiple sources for research and analysis.
- Produced descriptive statistics and updated online dashboards to communicate economic data to external audiences.

SKILLS

Programming: Stata, R, Python

Data Analysis: Data Cleaning, Data Management, Data Visualization, Statistical Analysis

Software: Git/GitHub, LaTeX, Microsoft Excel

CONFERENCE PRESENTATIONS

“The Effects of Interstate Licensure Compacts on Mental Health”
Southern Economic Association Annual Meeting

Tampa, FL
November 2025

FELLOWSHIPS

Laney Graduate School Fellowship, Emory University

2022–Present

RESEARCH ABSTRACTS

“Crossing State Lines: Licensure Compacts, Provider Mobility, and Mental Health”

Abstract. Despite the high prevalence of mental illness, most Americans reside in areas with insufficient mental health professionals to meet demand. In response to widespread health professional shortages, policymakers have turned to interstate licensure compacts to streamline the licensing process for healthcare providers wishing to practice across state lines. This study examines the effects of interstate licensure compact adoption on mental health outcomes across participating states. Utilizing the staggered adoption of the Interstate Medical Licensure Compact (IMLC) and the Psychology Interjurisdictional Compact (PSYPACT), I analyze their impact on self-reported mental health, antidepressant prescribing rates, and suicide rates. The findings reveal no significant evidence that the adoption of interstate licensure compacts leads to improved mental health outcomes in states that participate. Thus, while these compacts may increase access to care, they do not appear to result in significant improvements in mental health outcomes, suggesting that broader interventions may be necessary to address the mental health crisis.
